## **PRIORITY MRI PROCEDURES FOR PATIENTS DURING COVID 19**

Here at Priority MRI, optimum patient care & safety are our top priorities!

We are now re-opened and receiving patients, after implementing a new set of COVID-19 safety measures & protocols to enhance the MRI experience for both patients & staff.

1. When we call you to book an appointment, you will be asked a series of COVID-19 screening questions in addition to our routine MRI safety screening questions.
2. You will be asked to review and sign a COVID-19 screening form upon arrival at the clinic.
3. You will be asked to comply with any requests from the MRI technologist eg. applying hand sanitizer, washing hands, donning gloves and/or masks, social distancing etc. if requested.
4. No unnecessary companions will be permitted to the clinic. They are asked to wait for you in your vehicle.
5. If you are presenting any COVID-19 symptoms you are requested to call ahead of your exam time and your appointment will be rescheduled when you have negative result. Please do not come to the clinic if you are unwell or are required to be in quarantine.
